Thrive Creative

CALGARY · CANADIAN ENGINEERS

You've built something. *We'll finish it, and help fund it.*

More founders now arrive with a prototype built in Lovable, Replit or Claude Code: good enough to show, not ready to launch. Thrive is the engineering department that takes it from there, with Canadian engineers, one dedicated lead, and the funding paperwork handled alongside the build.

FINISH YOUR BUILD

Start from what you have.

We review what you've built, keep what works, and build the backend, security and infrastructure it needs to launch. Your prototype becomes the spec, so requirements move faster.

FUND YOUR BUILD

SR&ED and IRAP, done with you.

Engineers document the work from day one, so your SR&ED claim is ready at year end. No fee and no cut of the credit. For IRAP and similar programs, we write the technical side.

OWN YOUR BUILD

Yours as it's written.

Code, designs and documentation are assigned to you the moment they exist. You hold the code, the servers and the keys throughout, and we never train anything on your data.

HOW WE START

01 **NDA.** Ours or yours.

02 **Send us what you've built.** A link, a repo, docs or a roadmap.

03 **A ballpark in hours.** From a three-hour discovery we don't bill for. No padded fixed quote.

04 **Agreement and kickoff.** A working session with your dedicated lead to set priorities. You make the final call.

05 **Build.** Weekly check-ins, with every task and its hour estimate visible in your backlog.

HOW BILLING WORKS

- ✓ One hourly rate across every discipline, from engineering and design to DevOps and CTO-level guidance.
- ✓ Only hands-on time is billed. Planning and internal discussion aren't.
- ✓ No minimums and no long-term contract. Scale up for a launch, down after it.
- ✓ Priorities change without change orders.

WHAT WE BUILD

New apps & SaaS · Stalled builds · AI & automation · Mobile · Integrations & data · Cloud & DevOps · SOC 2 / ISO-ready

Who's behind it. A Calgary software company founded by people from Passportal, SolarWinds and N-able. Our engineers are based in Canada and work in your time zone.

Talk to our clients. We can introduce you to Zamplo, Clarity Voice and Highwood Emissions Management before you sign anything.

Send us what you've built.

A real person replies within one business day with a ballpark in hours.
